

TELLURIDE ADAPTIVE SPORTS PROGRAM
ADAPTIVE PASS APPLICATION

Telluride Ski Resort offers an Adaptive Pass to people with specific disabilities at a significantly discounted price. Telluride Ski Resort contracts with the Telluride Adaptive Sports Program (“TASP”), which is a nonprofit organization dedicated to providing quality ski instruction and downhill snow sports experiences to people with disabilities at the Telluride Ski Resort. TASP determines an individual’s eligibility for an Adaptive Pass for the Telluride Ski Resort. In some situations, verification is required from a physician. Please complete the form below. Each application will be evaluated on a case-by-case basis. TASP will review each application and, based on the information provided and to the best of its ability determine eligibility for an Adaptive Pass. If you choose to not completely answer the questions on the application, you may not be eligible for an Adaptive Pass. **TASP and Telluride Ski Resort shall not be responsible for further investigation and shall not be liable to applicants or any other party for errors in judgment, the exercise of discretion or the acts or omissions of others.** The following conditions may constitute a disability that qualifies for an Adaptive Pass.

Blind: Legally blind (20/200 in the good eye) to totally blind. Individuals with one good eye are not Adaptive Pass candidates. Physician diagnosis may be required if there are any questions.

Amputations: Any single or combination of hand, arm, foot, leg amputations.

Deaf: The Adaptive Pass is for individuals who are legally deaf to totally deaf, having hearing loss of 35 decibels or more in both ears. The pass is not for individuals who have moderate hearing loss.

Cognitive Disabilities: A mental condition that affects the ability to process information and/or coordinate and control the body, which limits the individual’s ability to navigate the mountain safely and independently. Examples of severe cognitive impairments include, but are not limited to traumatic brain injury that results in severe cognitive impairments.

Developmental Disabilities: Autism, Down syndrome, Cerebral palsy, etc.

Physical Disabilities: Any individual with a permanent disability that requires adaptive equipment or adaptive ski technique. Adaptive equipment may include, but is not limited to, mono skis, bi-skis, dual skis, snow bikes, outriggers, ski bras, sliders and tethers.

Patient’s Name: _____

Primary Diagnosis: _____

Describe how this patient is qualified to receive an Adaptive Pass. What special considerations are required?

Does this patient require a companion/guide at all times when skiing/snowboarding? Y/N. If Yes, describe the reason.
